Work Experience

Omnexia Technology - Frontend Developer Intern | Dec 2025 – Present

- Built a fully **responsive and modern UI** for the **Omnexia** website using React, focusing on performance, reusability, and cross-device compatibility.
 - Led the **Git and GitHub workflow**, managing branching strategies, pull requests, and code reviews to ensure smooth team collaboration.
 - Developed and contributed to an **Employee Management System (EMS) portal**, handling UI development and API integration.
 - Integrated **RESTful APIs** with frontend components and implemented **Redux state management** for efficient and scalable application state handling.
-

Projects

1. Omnexia Technology Website - [Live Link ↗](#)

Tech Stack: HTML, CSS, JS, React, React Router, API

- Built a **responsive React.js UI** for the company website.
- Created **reusable frontend components** for scalable design and **React Router** for easy navigation.
- Ensured **cross-browser and multi-device compatibility**.
- Used **Git and GitHub** for version control and collaboration.

2. Chattr App - [Live Link ↗](#)

Tech Stack: HTML, CSS, JS, React

- Developed a **responsive chat application UI** using **React.js**.
- Implemented **component-based architecture** for reusable and scalable UI.
- Managed application state and dynamic UI updates for smooth user interaction.
- Deployed the application on **Vercel** and maintained the project using **Git/GitHub**.

3. E-Commerce Website - [Live Link ↗](#)

Tech Stack: HTML, CSS, JS, React.js, React Router, Redux

- Built an interactive SPA with React.js, React Router, and Redux for state management.
 - Implemented add-to-cart and dynamic routing.
 - Developed modular, reusable UI components for maintainability and scalability.
-
